A NEW BREED OF
HYBRID
CAMOUFLAGE

Dear Stephanie,

We wanted you to be the first to know about our exclusive and innovative [partnership with Prym1 Camo](#) — giving you greater protection when you need it most.

Created by an avid hunter and professional artist, Prym1 Camo blends the organic textures of nature with naturally-found patterns of wildlife. It's built to conceal when you're stationary or when you're on the move. Now, you can shield your firearm or accessory with premium Prym1 Camo designs on Gunskins wraps.

Prym1 Camo also has patterns for visibility — such as Fire Storm and Pink Out, meant to turn heads at the range and make a statement. Additionally, this partnership means more designs for tactical operations and military use.

You're getting the best of both worlds: Prym1 Camo designs on the quality Gunskins vinyl wraps you know and love — **available today!**
